ABOUT ME

I am Biswaranjan Patra, an MCA student with a keen interest in web development and digital technologies. I have built frontend websites using HTML, CSS, and JavaScript, with a focus on making them SEO-friendly and mobile responsive. My background in computer applications and visual arts helps me bring both technical skills and creativity to my work. I am eager to gain real-world experience, improve my skills as a full-stack developer, and contribute to meaningful IT projects.

EDUCATION

• 2024-2026

SKILLS

- Frontend: HTML, CSS, JavaScript, React(learning)
- Tools: Git, VS Code
- Teamwork
- Problem-solving and innovative mindset
- Quick learner and adaptable
- Creative and analytical thinker
- Responsive Design

PROJECT

- Rangriti eCommerce Website (Frontend Only) :- Using HTML, CSS, and JavaScript(Basic), I created a responsive eCommerce website inspired by Rangriti that showcases folk art products and has an appealing user interface and a smooth shopping experience.
- Smart Farm- The Farm Management System, or SmartFarm to assist farmers with day-to-day tasks like inventory management, crop records, and expense tracking, a basic digital tool was developed. The system's digital record management and simple data entry enhance farm productivity and decision-making.
